

**CALL FOR PARTICIPATION – PLEASE CONTRIBUTE TO
A PEOPLE’S ARCHIVE OF SINKING AND MELTING**

“Sinking and melting places” exist around the world. They are places that are already, or in the near future may become, uninhabitable because of the combined physical, political, and economic aspects of climate change, including sea level rise, erosion, glacial melting, and subsidence.

If you live along the San Francisco Bay Delta or other parts of California that are threatened to disappear—or if you are a climate migrant now leaving in California--please contribute an item from that place to *A People’s Archive of Sinking and Melting* (www.sinkingandmelting.tumblr.com).

Item Name _____

Materials _____

Your Name _____

Location found _____

Latitude/Longitude (if available) _____

The location is ___sinking ___melting ___Other (describe) _____

Date found (or contributed) _____

Notes, further information: _____

OPTIONAL INTERVIEW

Do you live where the object came from? _____

If not, what is your relationship to that place? _____

What have you seen disappear, or expect to disappear, environmentally or otherwise? _____

What do these disappearances mean? _____

What’s your relationship to the object you contributed? _____

Why did you contribute to the archive? What do you hope for your contribution, and the archive generally, to change or draw attention to? _____
